

LAKSHMI NAVYA PODAPATI

Worcester, MA | +1(469) 657-9036 | lakshminavyapodapati@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Data Analyst with hands on experience delivering Business Intelligence and Reporting solutions across financial and operational domains. Skilled in SQL (joins, CTEs, aggregations), Python (Pandas), and Excel, with hands-on experience building Power BI and Tableau dashboards that improved reporting efficiency by 30%. Experienced in KPI development, data validation, and reconciliation, translating transactional data into actionable insights for finance and operations teams. Strong cross-functional collaborator prepared to support Data Analyst, Reporting Analyst, and Business Intelligence roles in U.S. environments.

TECHNICAL SKILLS

Data Analysis & Querying: SQL (Joins, CTEs, Window Functions, Aggregations, Query Optimization), KPI Development, Data Validation, Data Reconciliation, Ad-Hoc Analysis, Business Intelligence Reporting.

Programming & Data Processing: Python (Pandas, NumPy), Data Cleaning, Data Transformation, Exploratory Data Analysis (EDA), Statistical Data Profiling, Automation Scripting.

Business Intelligence & Visualization: Power BI (DAX, Data Modeling, Interactive Dashboards), Tableau (Calculated Fields, Data Blending), Analytics Visualization, Dashboard Development, Data Visualization.

Data Platforms & Databases: Oracle ERP (P2P, O2C Modules), Oracle SQL, PL/SQL, Relational Databases.

Reporting & Business Operations: Financial Analytics, Operational Reporting, Supply Chain Analytics, Performance Monitoring, Cross-Functional Stakeholder Reporting.

Tools: Microsoft Excel (PivotTables, Power Query, XLOOKUP), BI Publisher.

PROFESSIONAL EXPERIENCE

Data Analytics Consultant

May 2025 - Nov 2025

Freelance | Worcester, MA

- Developed Power BI dashboards with data modeling and DAX measures for multi-property financial reporting, integrating SQL datasets and reducing monthly reporting time by 30%.
- Analyzed four years of transaction data using SQL joins and aggregations to standardize expense classifications, improving category-level accuracy across fiscal cycles.
- Automated reconciliation workflows using Python (Pandas) and Excel Power Query, eliminating manual checks and saving 8-10 hours monthly.
- Built KPI tracking models in Excel (PivotTables, XLOOKUP) to monitor cash flow and vendor payment cycles, enabling early detection of delays.
- Performed data validation and reconciliation across financial ledgers to correct inconsistencies, reducing reporting discrepancies by 15%.
- Partnered with property managers to translate operational questions into structured SQL queries and dashboard visualizations, supporting monthly financial review discussions.
- Designed Tableau dashboards to present expense variance and cost allocation insights clearly to non-technical business stakeholders.
- Structured relational datasets using Python (Pandas, NumPy) for cleaning and transformation, reducing ad-hoc reporting turnaround time by 15%.

Reporting Analyst

Aug 2023 - Dec 2023

Genpact | Hyderabad, India

- Optimized SQL queries using joins, aggregations, and window functions within Oracle ERP to streamline recurring financial and supply chain reports, reducing report generation time by 20%.
- Developed 15+ BI Publisher reports for P2P and O2C workflows, improving visibility into invoice aging and payment status for finance teams.
- Built Power BI dashboards to track procurement KPIs and operational metrics, supporting weekly cross-functional performance reviews.
- Identified transactional discrepancies using SQL aggregations and reconciliation logic, improving vendor master data accuracy by 18%.
- Enhanced PL/SQL reporting logic and stored procedures to refine data extraction rules and validation checks, ensuring accurate and consistent financial summaries during monthly close reporting cycles.
- Collaborated with finance and operations stakeholders to gather reporting requirements and validate outputs prior to production release.
- Created Excel dashboards (PivotTables, Power Query) to monitor supply chain KPIs across procurement and vendor management processes.
- Delivered ad-hoc financial analysis using SQL and advanced Excel functions to support leadership decisions during quarter-end reviews.

Data Analytics Intern

Jan 2023 - Jun 2023

Contolytics AI | Hyderabad, India

- Processed real-time telemetry datasets using Python (Pandas) to clean and validate sensor data for improved safety monitoring accuracy.
- Designed structured SQL logging tables to capture device activity records and support efficient troubleshooting during testing cycles.
- Conducted exploratory data analysis (EDA) using Python (Pandas, NumPy) on alert patterns to refine threshold parameters and reduce false alerts during pilot deployment.
- Collaborated with hardware engineers to validate sensor outputs and align reporting metrics with operational safety requirements.
- Built internal performance dashboards to summarize device uptime metrics and alert trends for recurring engineering review meetings.
- Documented data transformation and validation workflows to ensure consistent integration between firmware outputs and reporting datasets.

PROJECTS

Sales & Revenue Analytics Dashboard

- Built a centralized sales dashboard by transforming transactional data using SQL and Excel Power Query, reducing manual reporting effort by 35%.
- Developed DAX-based KPI models in Power BI to track revenue, conversion rates, and regional trends, improving visibility into underperforming segments by 25%.
- Standardized multi-source sales data before visualization, increasing reporting accuracy and reducing inconsistencies across monthly reviews.

Operations Performance & Process Efficiency Analysis

- Analyzed operational workflow data using SQL joins and aggregations to identify processing delays, supporting improvements that reduced turnaround time by 12%.
- Automated recurring performance reports using Python (Pandas) and Excel PivotTables, saving approximately 6 hours per reporting cycle.
- Designed KPI scorecards to monitor throughput and error rates, enabling data-backed prioritization of process improvements and improving metric tracking consistency by 18%.

EDUCATION

Master of Science in Computer Science

Aug 2025

Clark University | Worcester, MA

Bachelor of Technology in Electronics and Communication Engineering

Jul 2023

BVRIT | Hyderabad, India
